## PROFESSIONAL SUMMARY

Product and design-focused B.Tech Computer Science (AI & ML) student with experience in product ideation, user-centered design, UX, data analytics and technology-driven problem solving. Patent holder with hands-on experience taking physical product concepts from research and ideation to CAD, prototyping and product detailing. Skilled in using Python, SQL, Power BI and Tableau to analyze data and derive product insights. Interested in building user-centric products at the intersection of technology, design, data and business.

## EDUCATION

VIT Bhopal University

2023-2027

**Bachelor of Technology - Computer Science(Artificial Intelligence and Machine Learning)**

## RELEVANT EXPERIENCE

### PRODUCT DESIGN & INNOVATION | ACADEMIC / INDEPENDENT | 2024-PRESENT

- Developed physical product concepts through research, ideation, CAD and product detailing.
- Gained practical exposure to **patent development** and filing through a patented multipurpose cutting-board product.
- Applied user-centered design, biomimicry and inclusive design across product concepts.
- Designed digital experiences using Figma, combining UX with AI/ML concepts.
- Applied data analytics and visualization using Python, SQL, Tableau and Power BI to identify trends and derive actionable business and product insights.

## PRODUCT & ANALYTICS PROJECTS

### Consumer Shopping Behavior Analytics – Data Analytics / Product Insights | 2026

- Tool used - Python, Pandas, NumPy, SQL, Power BI**
- Analyzed consumer shopping behavior to identify purchasing patterns, customer preferences and product-level insights.

### Deloitte – Daikibo Manufacturing Telemetry Analysis | 2025

- Tool used - Tableau | Data Analysis | Data Visualization | JSON**
- Analyzed manufacturing telemetry data to identify operational patterns and potential areas for improvement.

### Origami Play Station Suitcase – Inclusive Product Design | 2026

- Designed a portable play system focused on inclusive and accessible play, incorporating tactile elements, Braille and color-blind considerations.

### Bio-Inspired Octo-Arm System – Biomimetic Product Design | 2026

- Developed product concepts inspired by octopus movement and bat ecology, exploring adaptable mechanisms for real-world applications.

### Multi-Functional Chopping Board – Household Product | 2024-2025 (Patent)

- Designed a multifunctional kitchen product focused on ergonomics, usability and efficient household workflow.

### Multi-Bag Holder – Functional Product Design | 2025-present

- Developed a compact solution for organizing multiple bags at once.

## SKILLS

**Product Design:** Product Ideation, Industrial Design, Design Thinking, User-Centered Design, Ergonomics · Biomimicry · Product Development, Prototyping

**Data & Analytics:** Python, Pandas, NumPy, SQL, Tableau, Power BI, Data Analysis, Data Visualization, Consumer Behavior Analysis

**CAD & 3D:** SketchUp, Rhino, FreeCAD.

**UI/UX:** Figma, Miro, Wireframing, User Flows, Prototyping.

**Design:** Product Detailing, Concept Development, Visual Storytelling.

**Innovation:** Patent Development, Problem Solving, Research, Concept Validation

## ACHIEVEMENTS & CERTIFICATIONS

- **Patent Holder** - 2025 — Multi-Functional Chopping Board — Contributed to research, product ideation, development and detailing of a patented household product.
- **Deloitte Data Analytics Virtual Experience-** 2025 — Completed Daikibo Manufacturing Telemetry Analysis using Tableau, JSON and data visualization.
- **Google IT Support Professional Certificate | Google** -2026— IT fundamentals, troubleshooting and technical support.
- **NPTEL — Cloud Computing | IIT Kharagpur-** 2025 — Certification in cloud computing fundamentals and technologies.
- **NPTEL — Introduction to Internet of Things | IIT Kharagpur-** 2026 — Certification covering IoT, data analytics, cloud computing and connected systems.
- **Goldman Sachs 10,000 Women | Coursera** -2026— Business and entrepreneurship learning covering business growth, strategy and opportunity evaluation.
